Empathy Map

Create an empathy map to understand the customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I have a story idea but cannot turn it into a comic easily. • I want the comic to look engaging. • I want to generate it quickly.	THINKS • Can AI understand my story correctly? • Will the generated panels match the story? • Can I create a comic without design skills?
PERSONA Aspiring Comic Creator <i>(Student / beginner content creator)</i>	
DOES • Writes a short story or prompt. • Experiments with AI-generated content. • Reviews and refines the generated comic.	FEELS • Excited to visualize creative ideas. • Frustrated by manual comic creation. • Curious about AI-generated storytelling.

Role / User Type: Student / beginner content creator who wants to convert story ideas into visual comics.
