

Solution Architecture

Date	30 September 2026
Team ID	6ab3ecd3a238dc999eb3fcc2
Project Name	ComicCraft AI
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Collects story/prompt, character and settings inputs; previews generated panels.	HTML/CSS/Jinja2
API Gateway	Routes web requests into the comic-generation workflow.	FastAPI / Uvicorn
Core Logic / Services	Generates story/dialogue and comic panels, then prepares the result for preview/PDF export.	Python, Gemini AI, image-generation pipeline
Data / Storage	Persistent database/storage technology is not specified in the available project context.	[Information Required]
