Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Consistent formatting.
2	Proper File Structure	Files and folders are logically organized	Yes	Logical project structure.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear variable names.
4	Function / Method Names	Functions are descriptively named	Yes	Descriptive function names.
5	Code Comments	Inline and block comments explain logic	Partial	Key comments/docstrings.
6	Modular Design	Code is split into reusable functions/modules	Yes	Focused service functions.
7	No Redundant Code	Duplicate or unused code is removed	Partial	No obvious duplicate core path.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Provider errors handled.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Gemini AI module	Python / Gemini	Five-panel story generation.	High
2	Image generator	Python / Requests / PIL	Panel image generation.	High
3	Comic pipeline	Python / Pillow	Validation, layout, speech bubbles.	High
4	PDF exporter	Python / fpdf2	Comic PDF export.	Medium
5	FastAPI routes	Python / FastAPI / Jinja2	Input, preview, asset endpoints.	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Aspect	5	Clear separation into app/ai/services and routes.
Code Layout & Structure	4	Descriptive names; focused functions.
Readability	4	Generation and export functions are separated.
Reusability	3	Key docstrings/comments exist; documentation is limited.
Documentation / Comments	4	Modular code with room for more tests/docs.

Overall Score

FastAPI app with separate AI, service and template layers. Gemini handles outline/story generation; comics are assembled as PNG/PDF. Error handling covers invalid input, provider failures and transient Gemini errors. GitHub repository is provided in the project documents.
